Cars are topic of academic inquiry at Stanford University program

BY TREVOR LARANJO, The Stanford Daily, 2011/10/16 10:06 PM

Stanford University's new program explores the role of cars in society and the ways in which they impact the environment.

Several professors in the Environmental Engineering and Policy program, which is part of Stanford's School of Engineering, have been exploring ways to make cars more environmentally friendly.

"Cars are a huge part of our society," said Prof. John Hoffman, who is leading the program. "They are a major source of pollution and greenhouse gas emissions.""Cars are a huge part of our society," said Prof. John Hoffman, who is leading the program.
